

POLICY STATEMENT

ICS has strong aims in respect of physical, economic and social impact of all construction schemes. We aim to contribute towards the improvement of the environment and support good practice and innovation.

For example reasons could be as below:

- When tenders are received the following are considered
- Compliance with control standards as a minimum requirement.
- Work with suppliers to improve systems.
- Use of recyclable materials
- Use of materials requiring minimum production costs
- Use systems that can be improved rather than replaced in the future
- Minimise site waste. Waste then binned and recycled
- Use of natural light
- Use systems which require minimal maintenance

General

- Reduced supply chain, single point delivery
- Reduce office paper systems
- Minimise disturbance caused by activities
- Engage with clients and professional teams to help towards efficient designs and improve standards.
- Reduce pollution and energy spend
- Involve employees, contractors, suppliers and designers in the improvement of environmental performance
- Respond to complaints quickly and revise systems when possible to improve performance
- Listen to ideas

This policy is issued to all staff.
